Profile summary

As a skilled web developer with 4+ years of expertise in database administration and website development, I bring strong creative and analytical abilities to projects. Adept at DevOps methodologies and a team player with a keen eye for detail, I am committed to delivering high-quality results. With a proven track record in developing and maintaining web applications, I excel in turning concepts into reality. My proficiency in database management, website development, DevOps and Linux has enabled me to contribute effectively to project success. I am dedicated to leveraging my intermediate DevOps skills to further enhance team performance and project outcomes.

Deloitte Australia Cyber Job Simulation on Forage — Deloitte Australia	1 Months

Completed a job simulation involving reading web activity logs Supported a client in a cyber security breach Answered questions to identify suspicious user activity

Projects

Wearl Tech & Wearl Ecommerce platform	6 Months

At Wearl, I led the end-to-end development and deployment of custom software solutions for clients across diverse industries. One project involved building a high-performance eCommerce platform that scaled to handle thousands of daily users, integrating secure payment gateways and real-time inventory updates. By combining modern frameworks, DevOps automation, and agile delivery, we not only reduced the client's time-to-market by 40% but also improved operational efficiency and customer satisfaction significantly.

RL Judicial	3 Weeks

Legal services portal offering case tracking, document management, and lawyer consultations.

Lanceplaza Freelancing Portal	3 Months
